

Sanjay Krishna T N

Cloud & DevOps Engineer | AWS

+91 9940495553 | tnsk1908@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Chennai, India

SUMMARY

Cloud & DevOps Engineer with hands-on experience in AWS infrastructure, Terraform automation, and CI/CD pipeline development using GitHub Actions. Skilled in deploying and managing multi-stack applications across AWS and Azure with logical workflow validation and infrastructure provisioning. Strong understanding of various services and cloud resource management. Passionate about scalable automation, intelligent cloud systems, and exploring AI/ML and LLM-driven DevOps innovation.

EDUCATION

Prathyusha Engineering College

B.TECH - Information Technology, Thiruvallur, Tamil Nadu

Nov 2022 - May 2026

CGPA : 8.20 / 10 (as of 7th Semester)

SKILL SETS

Programming Language: Python.

Cloud & DevOps Tools: AWS, Terraform, GitHub Actions, CI/CD Pipelines, Docker & Learning Kubernetes.

Technical Skills: Cloud Automation, Infrastructure as Code (IaC), Machine Learning, LLMs.

Soft Skills: Fast Learner, Problem Solving, Leadership Skills, Communication Skills, Morse Code.

PROJECTS

CLOUD DEPLOYMENT & AUTOMATION

SEPTEMBER 2025 - FEBRUARY 2026

- Configured and maintained CI/CD pipelines for multiple Staunch projects using GitHub Actions.
- Automated AWS and Azure deployments with Terraform, ensuring reliable and reproducible cloud infrastructure.
- Solely handled DevOps, IaC, and cloud provisioning responsibilities within the development team.

INTENT BASED CLOUD RESOURCE PROVISIONING

NOVEMBER 2025

- Developed a web-based cloud management dashboard that automates AWS resource provisioning using Terraform and FastAPI, with an interactive Streamlit frontend.
- Implemented user/admin login, OTP authentication, and request approval workflows for managing EC2 and S3 services without using the AWS console.

WORK EXPERIENCE

Cloud & DevOps Engineer – Staunch (On-Site)

SEPTEMBER 2025 - FEBRUARY 2026

- Handled cloud deployments, CI/CD automation, and Infrastructure as Code (IaC) for multiple Staunch projects.
- Configured GitHub Actions pipelines, automated AWS and Azure provisioning using Terraform, and maintained workflow reliability during development.
- Sole DevOps contributor responsible for deployment automation and cloud infrastructure management.

CERTIFICATIONS

- TCS - iON National Qualifier Test
- NPTEL - Cloud Computing
